

# Master of Nursing Practice (Perioperative Practices)

## ABOUT THE PROGRAM

Austin Health is offering registered nurses who have a keen interest in Perioperative Nursing the opportunity to undertake a Graduate Diploma in Nursing (Perioperative Practices) in conjunction with our partner, La Trobe University. This course articulates into the Master of Nursing. Students complete online course work and clinical assessments in a structured program whilst working in the perioperative clinical area. Clinical support is provided by our dedicated nursing education team.

## LEARNING OBJECTIVES

Students will develop advanced clinical patient assessment skills.

Students will develop advanced knowledge in the area of Intraoperative or Perianaesthesia nursing.

Students will apply principles of anatomy, physiology, development and pathophysiology in holistic health assessment.

Students will develop critical thinking and problem-solving skills, specialised clinical proficiency and effective communication skills.

Students will be an important part of a
