Austin Health Template Referral Guidelines | Created by: Jarryd Walkley and Ahmad Aly. Last Reviewed: July 2023 Review & Update by: Nurse Coordinator and HOU Bariatric Surgery, Surgical 3 Unit July 2023

AND

Previous clear and significant attempts at nonsurgical weight loss (provide documentation)

Age 18-65

EXCLUSION CRITERIA

Referrals will be declined if they meet any of the below criteria:

No documented previous attempts at weight loss

Age 65 + (for primary bariatric surgery only)

Current smoker or ceased < 3 months

Current alcohol or substance abuse

Edmonton Obesity Staging System Score 0 or 4

Active, untreated eating disorder

No evidence of previous weight loss attempts

End Stage comorbidity (EOSS Stage 4)

- Renal failure (dialysis)
- Cardiac failure
- Major active ischaemic heart disease
- 2 or more vascular comorbidities (IHD, CVA, CRF)
- Poorly functioning and unlikely to regain function

BMI 35-40 with NO comorbidity or functional affect

(no history of bariatric or metabolic surgery in the past)

Note:

Patients triaged by Austin Health Bariatric Surgery Team as suitable for 'Austin Operating Suite Only' (BMI > 52 females and BMI > 48 males AND/OR significant or untreated comorbidities) may wait a minimum 12 months for an appointment.

Patients triaged by Austin Health Bariatric Surgery Team as being suitable for 'The Surgery Centre Campus' (BMI <52 females and BMI < 48 males AND/OR little to no comorbidities) can wait up to 6 months for an initial appointment.

Contact the Bariatric Surgery Liaison Nurse for more information about surgery wait times and selection criteria via Austin Health switchboard (03) 94965000

EXCLUSION CRITERIA

Referrals for 'poor weight loss' following previous bariatric and metabolic surgery in the absence of complications

Management of gastric bands where initial placement of gastric band occurred outside Austin Health

<i>Further eligibility criteria will be applied by the bariatric surgery unit. Referrer will be notified by Specialist Clinics if patient deemed not suitable for surgical management.</i>

8. Gender – Male?

Epworth Sleepiness Scale (ESS) (Copyright © M/W. Johns 1990-1997)

How likely are you to doze off or fall asleep in the following situations, in contrast to just feeling tired? Even if you have not done some of these activities recently, think about how they would affect you.

Total Score		Chance	of dozing	
Situation	0	1	2	3
Sitting and reading		1	2	3
Watching television	0	1	2	3
Sitting inactive in a public space (theatre / meeting)	0	1	2	3
As a passenger in a car for an hour without a break	0	1	2	3
Lying resting in the afternoon		1	2	3
Sitting and talking to someone	0	1	2	3
Sitting quietly after lunch (with no alcohol)	0	1	2	3
In a car, stopped in traffic	0	1	2	3

Dr Johns permits the use of the ESS by individual people (including clinicians and researchers) free of charge
