

Do you or someone you know aged 55-85 have
mild cognitive impairment
or **mild Alzheimer's**
disease?

This clinical study is sponsored by a pharmaceutical company.

We invite you to contact us about a clinical research study now enrolling at our centre. Participants will complete a series of cognitive tests more often than in traditional studies, while taking a study medication, to see if this new testing approach can improve future clinical trials.

To find out more about this clinical research study, please contact:
